

CSC13009 – Mobile Application Development

Project Proposal

I. Information

Group ID: 7

Group name: SoloGuy

Members:

ID	Student ID	Full name
1	21127420	Nguyễn Đức Anh Tài

II. Project Introduction

- Sportifield is an all-in-one sports booking ecosystem that simplifies how you play. Our platform connects users with our local venues through a fast, intuitive interface, transforming the way sports enthusiasts discover, book, and enjoy their favorite activities.

III. Project description

- **Sportifield** is a comprehensive digital ecosystem designed to bridge the gap between sports enthusiasts and facility providers. By integrating a high-performance booking engine with a localized marketplace and community-driven features, Sportifield removes the friction of organizing athletic activities.
- For **players**, it's a personal concierge that handles everything from securing a pitch and renting gear to staying updated on sports news. For **facility managers**, it's a powerful Enterprise Resource Planning (ERP) tool that automates scheduling, streamlines financial reporting, and opens new revenue

streams through integrated e-commerce and food services. Sportifield isn't just a booking app, it's the digital home for the local sports community.
